🎓 EDUCATION

Bachelor of Computer Applications (BCA)

06.2023 – 04.2025 | Nadiad, India

SPU University, Vinayaka College, Nadiad

Pursued Bachelor of Computer Applications (BCA) from SPU

University, Vinayaka College, Nadiad, gaining a strong foundation in computer science and applications. Developed skills in programming languages, data structures, algorithms and software development principles.

🧠 SKILLS

Java

Python

PHP

JavaScript

HTML5

Css3

MySql

SQLite3

🔑 INTERESTS

- Coding, Traveling, Reading

📁 PROJECTS

Online Job Portal

As part of our BCA final year project, we have developed online job portal designed to connect job seekers with employers through a seamless and user-friendly digital platform. This project aims to modernize the recruitment process by offering features such as job postings, resume uploads, employer dashboards, and intelligent job-matching algorithms. Developed using modern web technologies, the portal ensures smooth navigation, real-time updates, and secure user authentication. With CareerLink, we aim to simplify the employment journey for both candidates and companies—making hiring smarter, faster, and more accessible. This project showcases not only our technical skills but also our understanding of real-world needs in the digital job market.

Gym Management System

This project presents a user-friendly and efficient Gym Management System designed to automate and manage the day-to-day activities of a fitness center. From handling member registrations, subscription plans, and attendance tracking to managing trainer schedules, equipment logs, and payment records, this system simplifies the entire gym management process. Built with a focus on speed, accuracy, and ease of use, the system reduces manual workload, minimizes errors, and enhances the overall experience for both staff and gym members. By integrating technology into fitness management, the project showcases how digital solutions can make gym operations more organized, professional, and scalable.
